

Ebor Beef Market Report

Tuesday February 28th 2017

Hi All,

This week's Market Rates

Slaughter Rates:

Slaughter cattle rates both over the hooks and through the physical markets in the last week have fallen. Falls of up to 20 c/kg over the hook have been common with more on the lesser quality cattle in the markets.

Feeder Rates:

The feeder market came under pressure in the last week, despite this I still have had a good Angus EU order with the rate at \$3.70 for March April delivery. Nearly all other feeder rates have come off or feedlots have indicated they will be lowering their rates with this week's quote. The feeder heifers have been hardest hit coming off up to 20 cents in the last week. Please note the higher rate on the feeder market is relative to weight. **Eg Angus \$3.80 up to 420kg whereas 420 – 500 is \$3.45. You can nearly take 10 cents off the top rates quoted below for the 400kg – 500kg prices. Except the EU rate is for Angus cattle up to 500kg empty less 10 for cattle to 500-540kg empty**

Store Rates:

While most grades of cattle were quoted back again this week the lighter restocker cattle have held up well with light Angus calves in Armidale making over \$4.00 and light heifers on AuctionsPlus making close to \$4.00 and steer portion making \$4.25.

General Information

A reminder that cattle numbers get rolled back to zero on the 1/3/2017. Cattle delivered on or prior to 28/2/2017 go onto last year's tally. Cattle delivered on or post 1/3/2017 will be on the new tally.
